leetcode.com/u/Yersh

Frontend developer with 4+ years of experience building scalable web, mobile applications using React and React Native, Next.js, TypeScript ecosystems.

Experience

React, React Native developer, Next.js, JaiyqDev – Uralsk, Kazakhstan Nov 2022 – Dec 2026

2Clicks:

- **Founding Lead Developer (Zero-to-One):** Spearheaded end-to-end development of the 2clicks ecosystem across [Web](#), [iOS](#), and [Android](#), establishing the technical foundation, modular architecture, and CI/CD pipelines from scratch.
- **Framework Migration & SEO:** Architected the transition from a legacy SPA to [Next.js](#), leveraging Server-Side Rendering (SSR) and ISR to achieve a 40% improvement in FCP and significantly higher SEO rankings.
- **Performance Engineering:** Achieved sub-second page loads and optimized Core Web Vitals by implementing advanced code-splitting, lazy-loading, and bundle analysis to minimize JavaScript payloads and TTI.
- **Feature Integration:** Integrated [Maplibre](#) for custom mapping, [Paystack](#) for multi-platform payments, and orchestrated complex OAuth flows (Google, Apple, Facebook) and Meta Ad Manager API integrations.
- **API integration:** Designed and integrated a robust REST API architecture using [Axios](#) and [\[Redux/Toolkit\]](#), streamlining global state management and reducing data-fetching boilerplate by 10
- **Refactored the native Android implementation:** Resolved platform-specific visual degradation by patching the underlying native Java layer of react-native-fast-image, ensuring high-resolution image parity across both Android and iOS devices.
- **Advanced Interactive UI:** Engineered a reusable component library featuring real-time notification systems, drag-and-drop dashboards, and native hardware integrations (Camera/Image processing) using [Redux](#) for scalable state management.
- **DeepLink and Notifications:** Engineered a comprehensive push notification ecosystem using [Firebase](#) (FCM) and [Notifee](#), mapping payload configurations to [React Navigation](#) deep links to drop users directly into active order monitoring views.

ReFreshly:

- **Lead Mobile Developer | React Native:** Spearheaded the "Zero-to-One" development of the [Refreshly Android application](#), delivering a pixel-perfect UI and scalable architecture from initial concept to deployment.
- **Quality Assurance & Testing:** Engineered a comprehensive E2E testing suite using [Detox](#), significantly increasing release confidence and ensuring the stability of critical user-facing flows.
- **Third-Party Ecosystems:** Orchestrated complex integrations including [Google Maps SDK](#), [OAuth](#) (Apple/Google), and [TipTopPay](#) for secure mobile payment processing.
- **Internationalization & UX:** Implemented global-ready localization using [i18next](#), managing multi-language support while maintaining strict adherence to high-fidelity design specifications.
- **Websocket connection** Integrated websocket connection using [Socket.io](#) for getting real-time updates on orders.

Other:

- **Software Engineer (React Native)**
- Collaborated within agile engineering teams to develop and deploy high-fidelity mobile applications, ensuring 100% adherence to pixel-perfect design specifications.
- Engineered and refactored complex iOS-specific UI components, leveraging native-bridge libraries to ensure a seamless and high-performance user experience.
- Implemented comprehensive internationalization (i18n) frameworks, enabling multi-region support and

localized content delivery across diverse user bases.

- Optimized frontend performance by identifying and resolving rendering bottlenecks and memory leaks within the React Native lifecycle.
- Maintained strict code quality standards through rigorous code reviews, unit testing, and documentation for internal enterprise-grade systems.
- Mentored junior engineers through structured code reviews and architectural guidance, establishing best practices for code maintainability and cross-team collaboration.

Technologies

Programming Languages: JavaScript/TypeScript, Next.js, C++ , NestJS, React, React Native, HTML, CSS

Libraries: Redux, Google, Facebook libraries, Gluestack, Material UI, react-native-reanimated, and other

Testing: Jest, Detox

Tools & DevOps: Github, Cloudflare, Gitlab

Education

Astana IT University, BS in CyberSecurity

2021 – 2024

- GPA: 3.5/4.0

Languages

- **English** - Proficient, **Kazakh** - Native, **Russian** - Fluent
